### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with George Bullwinkel on 13 November 2006.

2. The application has been amended as follows:

In claim 3, lines 1 and 2, "An assembly for mounting a mixing valve onto an opening in a shower stall wall, the mounting assembly comprising:" now reads as –The combination of a mixing valve, mounting assembly and shower stall wall, the mounting assembly comprising:--,

In claim 13, lines 1 and 2, "An assembly for mounting a mixing valve onto a shower stall wall opening comprising:" now reads as –The combination of a mixing valve, mounting assembly and shower stall wall, the mounting assembly comprising:--,

In claim 14, line 1, "assembly of claim 11", now reads as –assembly of claim 13--,

In claim 15, lines 1 and 2, "(New) The mounting assembly of claim 11 in which said ratchet means comprises inclined teeth pointing toward the backside of said shower stall wall." is to be deleted from the claim, claim 15 now reads as –15. (New) The mounting assembly of claim 13 wherein said hook elements are spaced around the periphery of said mounting sleeve.—

Claim 3 is allowable. The restriction requirement between Species I-V, as set forth in the Office action mailed on 3/13/2006, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claim 12, directed to is no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim. However, claim 12, directed to an assembly for mounting a mixing valve using bolts is withdrawn from consideration because it does not require all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

This application is in condition for allowance except for the presence of claim 12 directed to a species non-elected without traverse. Accordingly, claim 12 has been cancelled.
